People hesitate to tap the like icon if they notice only a few likes are on your content on the contrary people tend to like a post with 1000 instagram likes already since that implies a high social approval and looks more attractive thus increasing your instagram likes can persuade more people to like your content

For instance they may like and follow thousands of people but don't have many following them in return perhaps they don't make many if any posts themselves this doesn't necessarily mean that they are a bot but it does suggest that will be of little value as a follower they definitely don't influence anybody

The easiest way to spot a fake follower is to enter their account name into our audience credibility checker bot checker although most people won't have perfect scores here you will notice accounts with particularly low credibility scores
